

VISION FLEET

Low Cost. Low Carbon. Low Hassle.

A red car is partially visible on the right side of the frame, driving on a dark asphalt road that curves to the left. The road is marked with two parallel yellow lines. The background consists of a steep, rocky cliff face with some sparse green vegetation. The overall scene is bright and clear.

We help you
**TRANSFORM
YOUR FLEET**

Clean vehicles are the future of fleets: reduced emissions, lower operating costs and a more positive public image. Hybrids, plug-ins and natural gas vehicles have been on the market for years and have proven their reliability in the field, but large-scale deployments remain few and far between. In fact, only three out of every 1000 fleet vehicles currently in service are plug-in capable.

Vision Fleet works with fleet managers in cities, states and private companies to solve the economic and operational challenges associated with large-scale clean vehicle programs. Our platform is comprehensive and includes everything from tax-efficient financing to data-driven analytics to behavioral incentive programs. Our team of clean-vehicle experts will help you make informed right-sizing and substitution decisions and do everything necessary to reduce your total cost of ownership without compromising — and often enhancing — service.

Vision Fleet succeeds only when you save money, achieve your operational goals and exceed your service-level objectives.

SAVE MONEY FROM DAY ONE WITH THE CLEAN MILES LEASE

Budgets are limited, costs are unpredictable and tax credits are hard to capture. That's why Vision Fleet created the Clean Miles Lease. We provide the capital and mitigate the risks while you focus on managing your fleet.

The Clean Miles Lease is a low-cost, long-term and tax-efficient financial solution for clean fleets and covers all procurement and operating costs, including infrastructure expenses.

Clean Miles Lease rates are low and fixed, and in most situations, little or no investment is required up front so the savings are guaranteed and immediate.

Vision Fleet also monetizes tax credits for entities without tax capacity, including cities and universities, and shares the savings.

And because the Clean Miles Lease rates are locked in pre-deployment, many of the risks associated with advanced-fuel vehicle operations, including service and maintenance, energy price volatility and residual values, are Vision Fleet's to bear.

FINANCING

VISION FLEET CAPITAL

VISION FLEET iQ

GET THE DATA-DRIVEN INSIGHTS YOU NEED TO REDUCE FLEET COSTS

VF iQ is Vision Fleet's proprietary telematics and analytics package designed specifically for clean-vehicle fleets. VF iQ provides all the information fleet managers, drivers and other stakeholders need to make informed, data-driven clean vehicle decisions.

VF iQ collects and analyzes multiple data streams at the individual vehicle level. Proprietary algorithms flag issues before they become problems so you can proactively address operational challenges.

VF iQ's dashboards and reporting capabilities also provide detailed and timely clean vehicle-specific operating statistics and assessments, enabling people throughout your organization to keep tabs on your fleet and monitor progress towards objectives.

With VF iQ insights, fleet managers can provide a higher level of service with enhancements such as car sharing programs, driver incentives and situation-specific feedback and recommendation engines.

ANALYTICS

LIGHTEN YOUR LOAD WITH A PARTNER IN THE FIELD

Vision Fleet Assist is your advanced-fuel vehicle partner in the field. We'll train and educate your drivers on the specifics of clean vehicles, run point on infrastructure issues, and provide many of the backend services advanced-fuel vehicles require.

Pre-deployment, Vision Fleet Assist gathers and analyzes data on all your existing fleet vehicles. We'll recommend advanced-fuel vehicle exchanges and fleet right-sizings only when doing so makes operational and economic sense.

We'll also help you brand your initiative and communicate effectively with stakeholders regarding your objectives and successes.

And because we succeed only when you save, we'll work with you and your drivers on an ongoing basis to refine and incentivize behaviors and techniques which maximize the return on your clean vehicle investment.

Vision Fleet Assist lightens the load so you can continue to do your job effectively and efficiently, while also enjoying all the benefits of clean vehicles.

SUPPORT

A man and a woman in business attire are shaking hands outdoors. The woman is on the left, wearing a dark blazer over a light-colored top. The man is on the right, wearing a dark suit jacket over a light-colored shirt. They are both smiling and looking at each other. The background is a bright, out-of-focus outdoor setting with a building and a car.

VISION FLEET
ASSIST

INDIANAPOLIS

With Vision Fleet Capital's low-cost, fixed-rate Clean Miles Lease, Indy's savings are locked in, and because the Clean Miles Lease requires little or no money up front, the economic benefits begin to accrue immediately.

Using data and analytics from VF iQ, Indianapolis and Vision Fleet identified hundreds of right-sizing opportunities. In fact, when fully deployed, Indy's clean vehicle fleet will be more than 20% smaller than its legacy equivalent, but just as functional. That's good news for the environment and the city's finances.

Indianapolis' Division of Public Works and Vision Fleet Assist are working with numerous departments within the city's fleet and are deploying vehicles in dozens of use cases, including police, fire and code enforcement operations.

With our help, the city of Indy is deploying more plug-in vehicles next year than every other city fleet in the United States.

WE CAN ACCELERATE YOUR EFFORTS,
SO YOU CAN ACHIEVE YOUR GOALS.
